

ATM Safety Case

Course aim

The ATM Safety Case course is designed for personnel working within the safety domain, such as managers, assessors, and incident investigators.

After completing the course, the participants:

- Have knowledge and understanding of the safety case argument and the safety case framework in general.
- Understand the common structure of safety and risk management in a complex and dynamic environment like ATM.
- Have updated knowledge concerning the development within the safety domain.

Course structure

The course is 5 days in duration and consists of classroom training, discussions, and a case study.

Content in brief

The course covers topics such as, but not limited to:

- Exploring safety.
- Risk management.
- The Safety Case Process.
- The 10 Systems Thinking Principles.
- Case study.

Prerequisites

Previous safety domain knowledge or experience.
