

ATSEP Assessment Tools (online)

There are different ways to assess competence levels. One way is to use a Question Service, which is an online library with quizzes and examinations.

Question Service

Operational ATSEP staff can use the quizzes to identify their knowledge and skill levels in specific ATSEP qualifications, and to prepare themselves for their examination. A passed or failed examination can help organisations determine if the staff needs to attend a refresher course. Additionally, organisations can use the examination results to show the knowledge and skill level of their ATSEP staff to their local regulator.

The quizzes are available 24/7 with unlimited attempts. Examinations can be taken only once.

Broad variety of questions

The Question Service contains over 1000 questions in various formats, including multiple-choice, drag & drop, and clicking on a required area in a picture. We can assign specific questions to staff, depending on their certification:

- ATSEP Basic
- ATSEP Q COM Combined
- ATSEP Q COM Data
- ATSEP Q COM Voice
- ATSEP Q DAT-DP
- ATSEP Q NAV Combined
- ATSEP Q SMC Combined
- ATSEP Q SUR Combined
- Customer/site-specific questions

Tailored solution

The Question Service can be adapted, as all Online services, to the customer's needs and new material can be added to cover all client needs.

Prerequisites

- Operational ATSEP experience.
- We recommend a technical English language proficiency of at least ICAO level 4.
