ATSEP Initial Courses (online)

Course aim

Our ATSEP initial courses cover all the objectives stated in the regulations for ATSEP Basic and each chosen ATSEP qualification domain.

Course structure

This is an objective-based course, designed to be self-paced and flexible to the participant's schedule. To give the best learning experience, there are diverse ways to interact and apply knowledge. Full courses also include a learning kit with insights and ways that participants can expand their knowledge.

Course content

Our initial ATSEP courses give the participant all the content stated in the regulations, based on taxonomy levels.

- Basic
- Basic ICAO
- Qualification Shared
- Qualification Communication
- Qualification Navigation
- Qualification Surveillance
- Qualification Systems, Monitoring and Control
- Qualification Data Processing

Compliance with regulations

Our initial courses cover both ICAO and EASA regulations.

Prerequisites

We recommend a technical English language proficiency of at least ICAO level 4.

Examination & Certificate

The examination contains randomly picked multiple-choice questions based on the different distribution of areas within the Basic domain. The minimum pass requirement is 75%, with a possibility of a re-assessment within an agreed time frame to receive an ATSEP Basic Training Certificate.
