

NOTAM Origination Training

Course aim

The NOTAM Origination course is designed for aerodrome personnel and other relevant aviation professionals involved in NOTAM issuance. The course provides a comprehensive understanding of the importance of accurate aeronautical data for flight planning and safety.

Upon completion of this course, learners will have knowledge of:

- The purpose and significance of NOTAM.
- How NOTAM integrate with other aeronautical information.
- The criteria for issuing a NOTAM.
- The correct procedures for encoding and decoding NOTAM.
- Regulations governing NOTAM origination and dissemination.

How you will learn

The standard access is 90 days, and we estimate that half a day is needed to complete the course.

EPN on demand

EPN on demand provides learners with complete flexibility and control over their learning experience. It's a self-paced course, allowing the learners to access digital materials such as reading resources, videos, quizzes and interactive content whenever it suits their schedule. The learner automatically receives a certification upon completion.

What you will learn

The NOTAM Origination course includes the following topics:

NOTAM and Aeronautical Information

- The role of NOTAM in aviation safety and flight planning.

- The connection between NOTAM and other aeronautical information services.
- The regulatory framework for NOTAM origination.

Encoding and Decoding NOTAM

- The structure and classification of NOTAM.
- How to correctly format, encode, and decode NOTAM.
- Understanding and interpreting different NOTAM types.

This course ensures aerodrome personnel are appropriately trained in accordance with EASA regulations and helps maintain the highest standards of flight safety.

Prerequisites

The NOTAM Origination course is designed for aerodrome personnel and other relevant aviation professionals involved in NOTAM issuance. There are no prerequisites for taking part in this course.

Compliance with regulations

The course will cover EASA regulations requiring proper training for aerodrome personnel involved in NOTAM origination. The objectives include knowledge and understanding, which is compliant with Rules for Aerodromes (Regulation (EU) No 139/2014 (AMC1 ADR.OPS.A.057(a)(2);(3).
