

Pre-OJT

Pre-On-the-Job Training

Course aim

This course prepares students for the live complex and dense traffic situations they will encounter in their On-the-Job Training (OJT). After completion of this course, the students:

- Have enhanced their previously acquired Rating routines and skills through extensive use of simulations with site-specific facilities in the local airspace.
- Have knowledge and understanding of local regulations and procedures.
- Are prepared for live traffic situations that may be encountered in the unit.
- Have knowledge, skills, and understanding in accordance with the specified training objectives as described in the applicable unit training plan and otherwise relevant documentation.

Course structure

We customize our Pre-OJT courses based on the client's requirements and in cooperation with their training instructors, for on-site delivery.

Content in brief

We develop the content of the course in co-operation with the customer.

Prerequisites

- Completion of Entry Point North's relevant Initial Training and Transitional Training or equivalent.
- English language skills at ICAO level 4 or higher.
